

Oak Tree Life Cycle Sequencing Cards

Science
Pre-K, Preschool, Kindergarten

Copyright © www.prekinders.com 2009, Karen@prekinders.com

I hope you like this set! Please respect the work I have put into making this, and follow my **Terms of Use** below:

The printables in this collection may not be resold electronically or in print. They may not be shared (for free or for profit) on websites, through email, on email lists such as YahooGroups or similar, or other electronic means. If you have any questions, please email me.

These may be printed or photocopied for classroom, homeschool, or personal use only.

Directions for Use:

Print and cut out each of the cards. (Do not cut apart the cards on the self-checking sheet.) Laminate if desired for durability. Place the cards in a stack. First teach children the life cycle of the oak tree by showing the pictures one at a time, in order, and discussing with the children the features of the oak tree at each stage of its life. These can be placed in a science center. During center time, children can place the cards in sequential order, using the self-checking card, if needed.

Oak Tree Life Cycle

Oak Tree Life Cycle Self-Checking Card

1. Acorns

2. Seedling

3. Young Oak Tree

4. Grown Oak Tree
