

Poison Dart Frogs

*Slideshow by Karen Cox,
PreKinders.com*

Poison dart frogs live in tropical rainforests.

Poison dart frogs live near the ground or in trees.

Poison dart frogs eat small insects and spiders.

Poison dart frogs are very small
(1-6 cm).

Poison dart frogs carry their tadpole babies on their backs.

Poison dart frogs have brightly colored skin to scare away their predators.

Poison dart frogs have poison on their skin. Natives use the poison in blow darts.
